Q.No

Q.No

1

A]

Cost Accounting

Cost Accounting is the Accounting practiced for a product/service before we place a price on it. It is the calculation done for to determine the cost of it.

- Clear representation of expenses.
- Cost sheet can be used for Audit and for information for a decision.

B]

Financial Accounting

Financial Accounting is the accounting practice done for finances.

- Financial Accounting

- It is only for internal stakeholders.

- It only based on past data, can't predict.

Q.No

C]

• Direct Costs.

→ Direct Raw material cost

→ Direct Labour cost

→ Direct Expenses.

D]

Cost sheet:-

A cost sheet is a sheet of cost. The cost sheet consists of all the direct and indirect costs happened for the product/service to be produced.

The cost sheet is very important for to be happened

→ Expense tracking

→ Transparency.

→ Inventory management.

Q.No

E1.

Cost of sales:

~~Given~~

$$\text{Cost of Sales} = \text{TC} + \text{ofh} - \text{CFG}$$

$$\text{Total cost} = 4,80,000$$

$$\text{Total cost} = 4,80,000$$

$$\text{opening Finished Goods} = 50,000$$

$$+ \underline{\hspace{1cm}}$$

$$5,30,000$$

$$\text{closing Finished goods} = 70,000$$

$$- \underline{\hspace{1cm}}$$

$$4,60,000$$

$$\therefore \text{Cost of Sales} = \text{₹ } 4,60,000$$

F/ Prime cost.

$$\text{Direct Material} = 65,000$$

$$\text{Direct Labour} = 50,000$$

$$\text{Direct Expenses} = + 15,000$$

$$+ \underline{\hspace{1cm}}$$

$$1,30,000$$

~~$$\text{prime cost} = 120,000$$~~

$$\text{prime cost} = 130,000$$

Q.No

2

A) Cost sheet.

Direct materials = 6 00 000

Direct Labour = + 4 00 000

Prime cost = 10 00 000

Factory overheads = 3 00 000

75% of direct labour

= $\frac{75}{100} \times 4 00 000$

= 3 00 000

+

13 00 000

Work cost office overheads = 2 60 000

20% of work cost

= $\frac{20}{100} \times 13 00 000$

= 2 60 000

+

15 60 000

Selling overheads = + 1 00 000

Sales = 15 00 000

= 1 60 000

Profit = ₹ 1, 60, 000

Q.No

B1

Fixed cost; Variable costs, semi-variable costs.

Fixed cost: It is fixed cost when the cost of the product is fixed, there is no chance to change it, change it would be to change the direct or indirect costs tied to it.

Variable cost: It is the variable cost of the product. which means there is a little wiggle room for the cost to go either higher or lower. It depends on the costs of the raw materials.

Semi-variable costs: It is similar to variable cost but the variable is not in our hands, it could be supply demand. on quality of good to change the cost, it depends on the cost of the raw material.

Q.No

c)

Cost sheet.

A cost sheet is a sheet of cost. The cost sheet consists of all the direct and indirect costs happened for the product to be produced.

The cost sheet can be used and be helpful in many ways. The cost sheet is very important for to be prepared.

- Expense tracking
- Transparency
- Inventory management

Q.No

D/ Cost Sheet.

$$\begin{array}{rcl}
 \text{Cost of production during year} & = & 8\ 00\ 000 \\
 \text{Opening stock of goods} & = + & \underline{40\ 000} \\
 & & 8\ 40\ 000
 \end{array}$$

$$\begin{array}{rcl}
 \text{closing stock of goods} & = & \underline{60\ 000} \\
 & & 7\ 80\ 000
 \end{array}$$

$$\begin{array}{rcl}
 \text{Selling and distribution overheads} & = + & \underline{90\ 000} \\
 & & 8\ 70\ 000
 \end{array}$$

$$\begin{array}{rcl}
 \text{Sales} & = & 10\ 00\ 000 \\
 & = & \underline{\quad\quad\quad} \\
 & & - 1\ 30\ 000
 \end{array}$$

$$\text{Profit} = -130\ 000$$

∴ profit was not achieved, Loss of 130 000

Q.No

3

A company operating in Hyderabad has requested to prepare a Cost Sheet for the year ended 31 march 2025

Cost Sheet

Cost sheet of XXX
31 march 2025.

Materials

Purchase at Raw materials	: 3 80 000
Opening stock at Raw materials	: 50 000
	<u>4 30 000</u>
Closing stock at Raw materials	: 60 000
	<u>4 90 000</u>

Labour.

Direct wages	: 1 90 000
	<u>6 80 000</u>
Factory overheads	: 95 000
	<u>7 75 000</u>

Expenses

Opening work in progress	: 40 000
Closing work in progress	: 45 000
	<u>7 70 000</u>

Continued

on Next page

Q.No

775 000

Expenses.

Opening work in progress. = + 40 000
8 15 000

closing work in progress = - 45 000
7 70 000

office overheads = 70 000
8 40 000

8'40 000

Q.No

5

Elegant tailors received a bulk order to stitch
200 uniforms for a school. Job No 78

Job Cost sheet 78

Job cost sheet for Elegant tailors
Job no 78

Materials.

Cotton cloth	=	1 10 000
Cotton threads	=	30 000
	+	
		1 40 000

Labour.

Direct Tailor's wages	:	90 000
Indirect cutting	+	15 000
		2 45 000

Expenses

Design charges	+	5 000
		2 50 000

Factory overheads.

50% of Direct wages.

$0.5 \times 90 000$

= 45 000

	=	45 000
		2 95 000

Q.No

$$\text{Total cost} = 295\,000$$

30% profit.

$$\begin{aligned}\text{profit} &= 0.3 \times 295\,000 \\ &= 88\,500\end{aligned}$$

$$\begin{aligned}\text{Selling price} &= \text{TC} + \text{profit} \\ &= 88\,500 + 295\,000 \\ &= 383\,500\end{aligned}$$

200 units.

$$\text{price per piece} = \frac{\text{SP}}{\text{Total Cost}}$$

$$\Rightarrow \frac{383\,500}{200}$$

$$= 1915.5$$

$$\text{TC} = 295\,000$$

$$\text{Profit} = 88\,500$$

$$\text{SP} = 383\,500$$

$$\text{Cost per unit} = 1915.5$$
